You always have been looking for ...

- an integrated, complete solution for the information technology of your airport?
- optimising your business processes?
- a cost-effective standard solution instead of expensive individual developments
- a solution, that keeps on growing with your business?
- the experience of numerous international airports for your enterprise?
- co-operation with a reliable software partner?

Then you should contact us!

Approach

Quite often the tasks of cargo handling are looked upon today as separated from an integrated airport IT solution.

SKY-Cargo breaks new ground: Cargo handling here is a fully integrated component of our airport solution **SKY-Base**.

The operation of complex interfaces is replaced by a common user interface and the **SKY-Base AODB** as a common database.

Overview

SKY-Cargo supports:

- Maintenance of import and export cargo shipments
- Calculation and billing of cargo-related charges as part of aeronautical charging
- A optional connection to systems of customs authorities
- Sending and receiving of SITA messages via SITATEX

FLIGHT	DATE	TIME	STATUS	FINANCIAL DATA
10001	20110101	10:00	OK	1000
10002	20110102	11:00	OK	1000
10003	20110103	12:00	OK	1000

Common functions:

- Flight plan
- Charging
- Billing
- Cash accounting
- Statistics
- Financial accounting interface

Common data:

- Customers
- Season flight plan
- Daily flight plan
- Tariffs
- Charge data
- Invoices

CUSTOMER	FLIGHT	STATUS
10001	10001	OK
10002	10002	OK
10003	10003	OK

Charging And Billing

- Billing
 - Automatically produced charges
 - Manually entered services
- Production and printout of bills
- Cash accounting especially for collection of goods
- Flexible definition of special customer conditions
- Interface to financial accounting systems
- Flexible statistical evaluations of
 - Revenues
 - Cargo

The Cargo Warehouse

- Flight plan for cargo flights and trucks
- Export warehouse
 - Transfer of export goods with
 - Manifest and
 - Charging
- Import warehouse
 - Transfer of import goods with calculation of
 - Handling charge and
 - Storage charge
 - Break bulk
- Collection of goods

Communication

The SKY-SITA-Server connects SKY-Cargo with the world-wide airline communication network via the standard of SITATEX for transmission and reception of cargo messages.

Automatically processed incoming FFMs reduce the efforts of airway bill entry to a minimum. The production of outgoing FFMs fastens the handling process considerably.

As an option systems of customs authorities may be connected to SKY-Cargo for the production of goods to the customs.
