Are you still looking for a charter sales system that offers you the necessary business flexibility and saves you time as well? Then consider TANGO - the charter sales system created by ISO Software Systems.

With TANGO you will have a solution which covers all the functionality of a modern charter sales system and which offers interfaces to other Systems such as TOPIX, the Charter Single Seat Sales System or OCEAN, the modular Tour Operator System

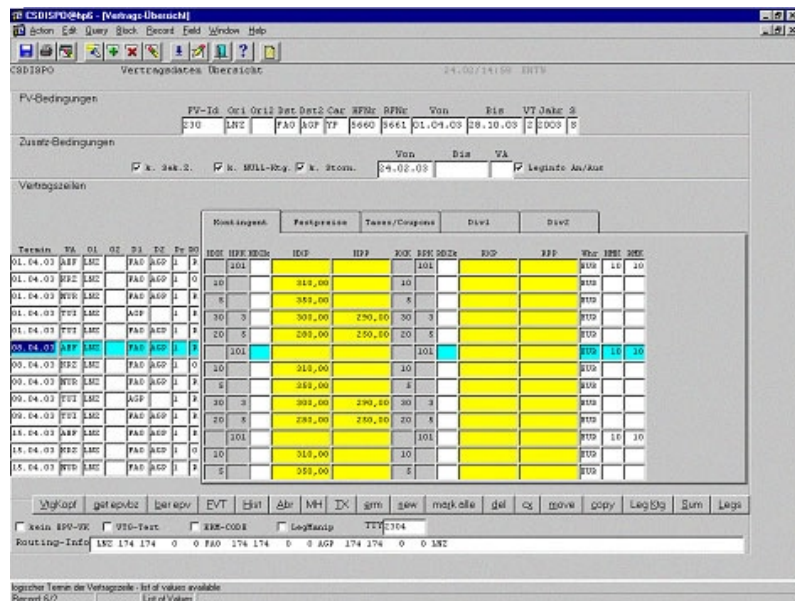

Management Information System
Flight Operations

TANGO

Flight Management System
Accounting System

THE EFFICIENT AND FLEXIBLE
 CHARTER SALES SYSTEM

Tour Operator System
Single Seat Sale System

Technical Issues

- Graphical User Interface ORACLE FORMS
- Data base ORACLE 8.1.7 and higher

TANGO has already proved itself!

The charter carrier Aero Lloyd ran its charter business with approximately 600,000 pax per year using TANGO from June 2001 onwards, combined with the single seat reservation system TOPIX, also developed by ISO Software Systems.

Now the new charter carrier AERO FLIGHT is using both applications which share a common flight plan thus considerably reducing maintenance costs. Are you ready for a TANGO together with ISO Software Systems? We would be delighted to discuss business opportunities with you in greater Detail.

Overview of TANGO Functionality

- Independent Planning Environment for Flight Plan Charter Contracts
- Interface between Planning and Production Environment
- Charter Contract Creation
- Daily Contract Adjustments
- Processing of Booking Figures
- Invoicing
- Statistics
- Online Interface to Single Seat Sales System such as TOPIX or OCEAN (ISO Solution for Tour Operators)
